## PROFESSIONAL SUMMARY

DevOps / Site Reliability Engineer with 7 years of experience supporting and automating large-scale Linux and cloud environments. Strong background in CI/CD pipeline implementation, AWS infrastructure automation, and infrastructure as code using Terraform. Proven ability to improve system reliability, streamline deployments, and collaborate effectively with development and QA teams to deliver stable, secure, and scalable platforms.

## TECHNICAL SKILLS

**Operating Systems & Scripting:** Linux, Bash
**Cloud Platforms:** AWS (EC2, S3, IAM, VPC, CloudWatch), Azure
**CI/CD & Automation:** Jenkins, GitLab CI/CD, GitHub Actions
**Containers & Orchestration:** Docker, Kubernetes
**Infrastructure as Code:** Terraform, CloudFormation
**Monitoring & Observability:** CloudWatch, Nagios, Prometheus, Grafana
**Version Control:** Git, GitLab

## PROFESSIONAL EXPERIENCE

### Tata Consultancy Services — *Indore, India*
***IT Analyst – Site Reliability Engineer*** — September 2022 – Present

- Administer and optimize Linux-based systems; use Bash scripting to automate deployments, log rotation, health checks, and routine operational tasks, improving system stability and operational efficiency.
- Manage source control and collaboration workflows using Git and GitLab, including branching strategies, merge conflict resolution, and merge request approvals.
- Design and maintain CI/CD pipelines with Jenkins, GitLab CI/CD, and GitHub Actions, enabling secure, reliable, and fully automated build, test, and deployment processes.
- Provision and support AWS cloud infrastructure (EC2, S3, IAM, VPC, CloudWatch) using Terraform and CloudFormation, improving scalability and consistency while reducing manual intervention.
- Containerize applications using Docker and support Kubernetes-based orchestration to enable scalable and resilient deployments across environments.
- Implement and maintain monitoring and alerting solutions using CloudWatch, Nagios, Prometheus, and Grafana, enhancing system visibility and enabling proactive incident detection.

### Tata Consultancy Services — *Indore, India*
***System Engineer – L3 Production Support*** — October 2018 – August 2022

- Provided Linux system administration and troubleshooting for mission-critical production environments with a focus on high availability.
- Managed OpenLDAP for authentication and directory services, ensuring secure and consistent access control across systems.
- Monitored infrastructure health using Nagios; proactively identified and resolved issues before they impacted service availability.
- Administered Azure IAM for identity and access management across cloud resources, enforcing least-privilege principles.
- Handled incident management and root cause analysis (RCA) for high-severity production issues, minimizing mean time to resolution (MTTR).
- Delivered L3 production support, coordinating with cross-functional teams to resolve complex escalations and maintain SLA compliance.
- Automated repetitive operational tasks with Bash scripting, significantly improving team efficiency and reducing manual error.

## EDUCATION

**Bachelor of Engineering** | UIT – RGPV, Bhopal CGPA: 7.1 / 10 | May 2018

## CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services
- Microsoft Azure Fundamentals (AZ-900) – Microsoft

## ACHIEVEMENTS & AWARDS

- Technical Excellence Award – Recognized for outstanding contributions in Site Reliability Engineering at Tata Consultancy Services (2025).
